# Glass **Configurator**

Highlighting the Thermobel brand name for insulating glass units produced by AGC and the use of your company logo
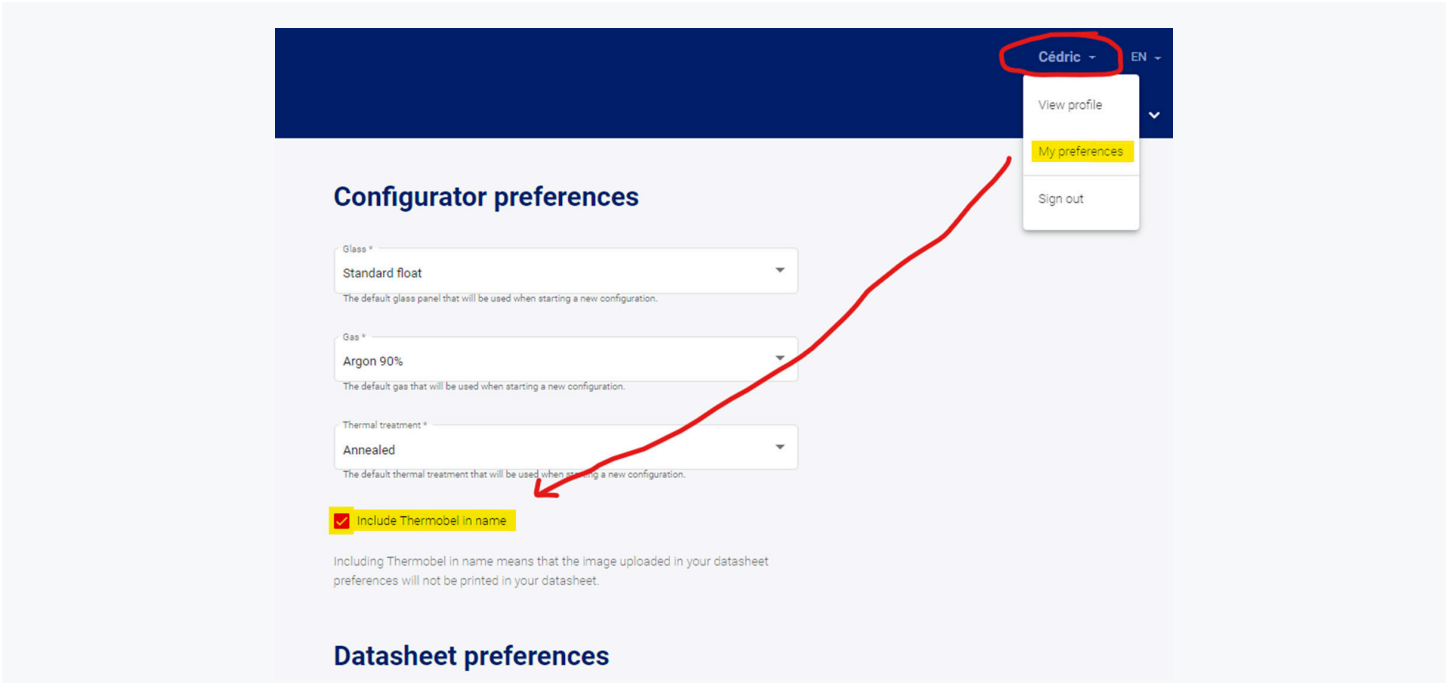

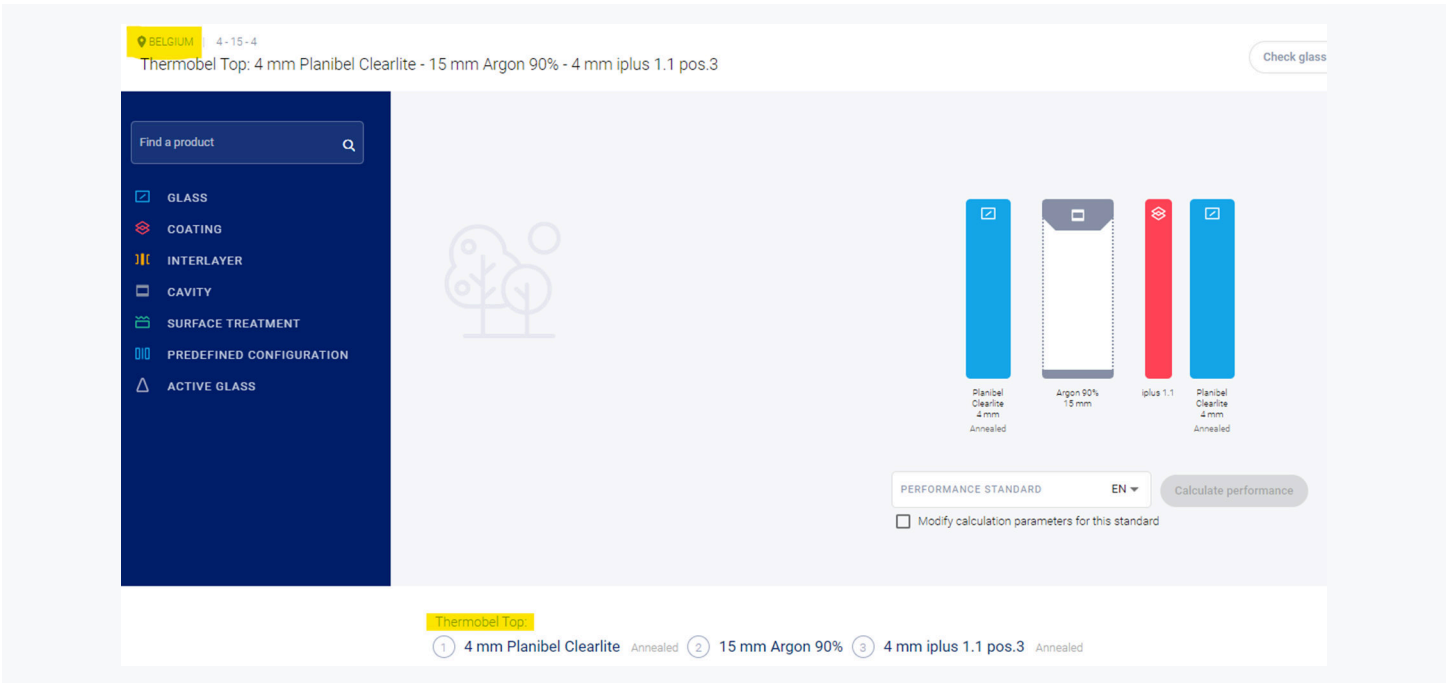

AGC

Your Dreams, Our Challenge

As you know, the Glass Configurator can be used to configure all types of glazing, including double and triple-glazed insulating glass units (IGUs). The Thermobel brand name is used to designate double-glazed IGUs produced by AGC plants, whereas Thermobel TG denotes triple-glazed IGUs.

Since the Glass Configurator is used by independent processors, we had to find a way to ensure that the terms Thermobel and Thermobel TG are used exclusively for glazing produced by AGC.

This option has been included in the user preferences (click your username in the upper right and then **My preferences**). When the **Include Thermobel in name** option is selected, the Thermobel trademark will appear in the product description, indicating that the glazing is intended to be manufactured in one of our AGC plants. Consequently, this option is only available if the project location is set to one of the countries where AGC has insulating glass production facilities, i.e. Belgium, France, the Czech Republic, Germany, the Netherlands, Poland and Slovakia. The Thermobel brand name is not used for insulating glass units produced by AGC Interpane, as no brand name was designated for these IGUs.

If the project location is in these seven predefined countries, the mentions Thermobel and Thermobel TG will appear as follows:

In addition, depending on the coating selected for the insulating glazing, the trademark will be modified as follows:

Insulating Glass Type	Double Glazing	Triple Glazing
Insulating glass without coating	Thermobel	Thermobel TG
Insulating glass with 1.1 coating	Thermobel Top	Thermobel TG Top
Insulating glass with 1.0 coating	Thermobel Advanced	Thermobel TG Advanced
Insulating glass with Energy coating	Thermobel Energy	Thermobel TG Energy
Insulating glass with Stopray coating	Thermobel Stopray	Thermobel TG Stopray
Insulating glass with Sunergy coating	Thermobel Sunergy	Thermobel TG Sunergy
Insulating glass with Stopsol coating	Thermobel Stopsol	Thermobel TG Stopsol

Under **My preferences**, you also have the option of adding a custom logo to the technical datasheets. This option is mainly used by independent processors, who often include their logo next to the AGC logo on the datasheet. Please note that this option is not available if the **Thermobel in name** option is activated. Including **Thermobel in name** means that the image uploaded in your datasheet preferences will not be printed on your datasheet.
