

STRATOBEL COLOUR

Colour & Safety:
Get Inspired

AGC

Your Dreams, Our Challenge

Stratobel Colour offers a range of eight classic colours inspired by nature, while still featuring the properties and specifications of laminated safety glass. The greys and browns lend character to your projects while maintaining visual comfort and light transmission. Combine films of the same colour to achieve the desired degree of opacity. Use multiple matt white PVB films (Mat 80 and Mat 65) for the perfect solution that protects you from prying eyes while still letting in light. In other words, you can create infinite variations for your external architecture and interior design projects.

Colour & Safety: Get Inspired!

STRATOBEL COLOUR

What's so special
about it?

What does this mean
for you?

Colour, diffused light and
transparency all combined in
one product

– Your glass can be transparent and let in light, or protect you from prying eyes depending on the atmosphere you want to create

Four trendy colours, including
three exclusives

– Stone Grey, Mineral Grey and Terra Brown - colours available exclusively from AGC - combine seamlessly with other products in the decorative range. Use Planibel Clearvision to make your colours pop even more

Each combination of products has
its own light transmission rating

– Use Stratobel Colour to play with different degrees of transparency for your architectural and interior design projects

Available fromstock and can be
mixed with other products in
the same pack

– Quick delivery times and flexible quantities which can be varied and combined

Compatibility tested between
colour PVB films and clear, matt
and acoustic films

– You combine the colour, effect and mechanical properties of the laminated glass

Technical data for coloured
films and combinations thereof
accessible in the AGC Glass
Configurator

– Just click on www.agc-yourglass.com to get the optical and mechanical properties for your projects

Order your custom colour via our
My Colour by Stratobel service

– Contact your AGC representative to create your own colour and get a sample, get a quote or place your order

Processing options

All conventional processing options available for laminated glass can be applied to Stratobel Colour. In case of use in external application, thermal absorption of some colours must be checked with our TAS department (Technical Advisory Service). Please contact the AGC Technical Advisory Service (tas@eu.agc.com) for more information (before using this address, you must first register at www.agc-yourglass.com).

Availability

Stratobel Colour is available in annealed laminated glass in PLF/DLF* dimensions and can be cut according to your specifications. Stratobel Colour is available in a wide range of thicknesses and dimensions, and can be assembled with Planibel Clearlite and Planibel Clearvision.

Stratobel Colour is also available in a laminated tempered version and in cut sizes from AGC processing subsidiaries. You can find all our subsidiaries at www.agc-yourglass.com/contact.

Examples of possible combinations for your projects

Compatibility (PVB film, 0.38)	Clear	White Mat 65	White Mat 80	Stratophone
