

**DECLARATION REGARDING AGC GLASS EUROPE PRODUCTS
SUBMITTED TO THE FRENCH LABELLING REQUIREMENT
OF VOLATILE POLLUTANTS EMISSIONS**

(English translation based on the original French text)

In conformity with the French Décret No. 2011-321 of the 23rd of March 2011 relative to the volatile pollutants emissions released by construction products, and complemented by the French Arrêté of the 20th of February 2012 that modifies the French Arrêté of the 19th of April 2011,

we,

AGC Glass Europe SA/NV
Avenue Jean Monnet, 4
BE 1348 Louvain-la-Neuve
Belgium

declares that, to the best of our knowledge, the products range Lacobel, Matelac, Mirox, Pyrobel, Sanilam, Stratobel, Stratobel PC, Stratophone, and Thermobel are classified according to the above-mentioned Décret and Arrêté. The classified products are available on Annex 1. Those products are also appropriately labelled when they are put on the French market.

Louvain-la-Neuve, 16 November 2023

Marc Foguene
Vice-President Sustainability, Architectural Glass Europe & Americas Company

Annex 1

Label:	Product:
 <p>*: Indoor emissions: Information on the emission level of volatiles substances in indoor air, and presenting a toxicity risk by inhalation, and based on a classification of "A+ class" (very low emissions) to "C class" (high emissions).</p>	<ul style="list-style-type: none"> - Lacobel SAFE+ (all colours) - Lacobel T, thermally toughened (all colours) - Matelac Silver - Matelac SAFE+ (all colours) - Matelac T, thermally toughened (all colours) - Mirolid Morena - Mirox 4Green - Mirox 4Green SAFE+ - Mirox 4Green+ - Mirox 4Green+ SAFE+ - Mirox MNGE (Mirox New Generation Ecological) - Mirox MNGE SAFE+ - Mirox MNGE Lead Free Cosmetic - Mirox MNGE Lead Free Automotive - Pyrobel and Pyrobelite - Stratobel - Stratobel PC - Stratophone - Thermobel - Thermobel SunEwat XL

*: Indoor emissions: Information on the emission level of volatiles substances in indoor air, and presenting a toxicity risk by inhalation, and based on a classification of "A+ class" (very low emissions) to "C class" (high emissions).

- Lacobel (all colours)
- Matelac (all colours, excepted for Matelac Silver that is A+)

Those products have been tested according to ISO 16000, that is the norm that is referenced in the French Arrêté of 19th of April 2011.

Labels can be uploaded on: <http://www.cohesion-territoires.gouv.fr/etiquetage-des-produits-de-construction> .

The following text must also appear on the label: "Information on the emission level of volatiles substances in indoor air that present a toxicity risk by inhalation, and based on a classification of "A+ class" (very low emissions) to "C class" (high emissions)".
