

# Lacobel T - Matelac T

## How to become a Lacobel T and/or Matelac T Certified Processor

The AGC Processor Certification Programme is an initiative by AGC Glass Europe to support its Certified Processors in supplying high-quality glass to the construction industry. If you would like to become one of our AGC Certified Processors, then contact your AGC Sales Representative and a member of our Technical Advisory Service (TAS) will get in touch with you to initiate the AGC Processor Certification Programme.

NOTE: See our Processing Guide (available at [www.agc-yourglass.com](http://www.agc-yourglass.com)) or watch the video by scanning the QR code for full information on how to process Lacobel T and Matelac T.

Your Dreams, Our Challenge

## WHAT'S IN IT FOR THE PROCESSOR?

- ✓ On-site technical support and consultation from the best qualified glass experts that helps improve your processes
- ✓ Dedicated marketing support:
  - product training
  - marketing collateral
  - glass samplesAll provided with a view to enhancing product knowledge and facilitating sales
- ✓ AGC Certified Processors are listed by country on the Lacobel T and Matelac T product pages of AGC's product website: [www.agc-yourglass.com](http://www.agc-yourglass.com).
- ✓ You will be in a position to reassure your customers that they are getting top-quality processed glass.

Each Certified Processor is recertified periodically, typically every 36 months. In this connection, you will need to confirm to AGC that you have not changed your production process in any way. If you change equipment or if AGC changes some important processing parameters during that period, our audit team will support you in updating your process to meet our requirements.

If you would you like to be part of the AGC Processor Certification Programme, please contact your AGC Sales Representative.
