

DECORATIVE INTERIOR GLASS

MOOD BOARDS

AGC

Your Dreams, Our Challenge

GLASS AS EMOTION. GLASS AS INSPIRATION.

An interior does not begin with furniture. It begins with light, reflection, texture, and colour. It begins with a material that can open up a space, soften it, highlight it, or define it. It begins with glass.

AGC has developed a complete range of decorative glass products – solutions that bring a new dimension to interior design so you can devote yourself fully to your projects.

We have created mood boards that combine glass with current material trends – wood, metal, stone, textiles, and contemporary surfaces. Explore the compositions and learn more about our glass and its potential.

The QR codes provide access to detailed product information.

Let glass become an integral part of your concept.

MyColour is AGC's custom colour system: if you can't find the exact colour that matches your client's project in our Lacobel and Matelac painted glass ranges or our Stratobel Colour laminated glass range, then consider our exclusive MyColour custom service to get the exact colour you need.

MyColour by Stratobel is available for any order of at least two packs, but the price depends on the quantity ordered.

MyColour by Lacobel and Matelac is not available for transparent and metallic colours or for Lacobel T and Matelac T (toughenable) range.

Contact your AGC representative for more information.

MyColour by Stratobel

MyColour by L/M

FIX-IN is a range of bonding and cleaning products developed by AGC in collaboration with a specialist in the field to ensure the perfect installation and longevity of its products.

AGC guarantees that the paint on its painted glass products and mirrors is compatible with its FIX-IN bonding solutions. The warranty is five years for Mirox, Lacobel and Matelac, and ten years for Lacobel T and Matelac T.

The range also includes touch-up paints to conceal small scratches in the paint on the glass as well as glass cleaning kits for an installation that is neat and tidy down to the smallest detail.

Discover more on our online store www.agc-store.com.

Our commitment to sustainability

AGC takes a holistic approach towards sustainable and circular glass manufacturing, integrating innovative technologies, responsible sourcing, and eco-efficient processes to minimise environmental impact.

Most of our products have an Environmental Product Declaration (EPD) and several of our products can help improve your ranking in building environmental certification programmes such as LEED® and BREEAM®.

AGC's patterned glass range is manufactured at our Brevka plant in Dubí, Czech Republic, in the revolutionary VOLTA furnace. This cutting-edge hybrid furnace - 50% electric and 50% fired by an oxygen-gas combination - not only leads to a significant reduction in direct CO₂ emissions, but also supports circularity by utilising a much higher proportion of recycled materials than typical in the industry.

AGC Glass Europe, a European leader in flat glass

Based in Louvain-la-Neuve (Belgium), AGC Glass Europe produces, processes and markets flat glass for the construction industry (external glazing and interior decoration), car manufacture and other industrial sectors (transport, solar power and high-tech). It is the European branch of AGC, a world leader in flat glass. It has over 100 sites throughout Europe.
