# Laminated Glass Protection Screen for shops and receptions

ShapeYourGlass offers a laminated counter protector barrier to be installed in shops. This solution will help to maintain social distancing between employees, customers and colleagues. It will therefore help to reduce the risk of propagation of viruses such as Covid-19.

- Counter protector barrier for shops and receptions\* with opening at the bottom to exchange documents and goods
- Available in clear laminated glass
- Dimensions: 95 cm x 95 cm
- Thickness: 4 mm
- Developed in Belgium and produced in France
- Price:
  - Decreasing price according to quantities ordered (contact us for more info)

\* Provided with 36 cm deep wooden supports that can be easily assembled by hand.

## Main advantages of glass

### Easy to clean

Alcohol-based detergent can be used without damaging the glass surface.

### Safe

The screen is made of two pieces of glass laminated together (like the windshield of your car). In case of glass breakage, social distancing and safety are still warranted because the glass shatters into blunt fragments which stick to the PVB.

### Durable solution

Unlike plastic solutions, glass is scratch resistant and doesn't fade over time. It is also a recyclable product (wooden supports included).

### Easy to install

Four wood pieces are mounted together to build one support. Each is marked with a digit.

We offer a similar product in thermally tempered glass, please contact [ProtectiveGlass@eu.agc.com](mailto:ProtectiveGlass@eu.agc.com) for more info.
