Architectural applications

ENERGY LIGHT

Energy Light – a new product in the ENERGY range – is a magnetron-coated glass designed for use in facade glazing and in the premium residential real estate market.

- Universal product (single stock) – can be used in both tempered and non-tempered versions with minimal difference in appearance.
- Excellent solar protection properties.
- Excellent energy efficiency.
- Can be made with Planibel Clearvision glass on request.

What's so special about it?	What does this mean for you?
Excellent energy efficiency	– Very low heat loss
Low solar factor	– Prevents the building from overheating due to solar energy transmission and ensures the greatest possible comfort for occupants
Excellent light transmission	– Lets in maximum natural light
Optimal reflection	– Gives the building a unique look
Neutral appearance	– Combines easily with facades in cool colours
When used with Planibel Clearvision	– Enhances the focus on neutrality

Standard thicknesses: 4, 6 mm
5100 mm x 3210 mm

Window applications

ENERGY LIGHT

ENERGY is a range of multifunctional glass products. The ENERGY range combines the characteristics of low-emissivity and solar-protection glass.

Energy Light is a medium-reflectivity glass with a neutral appearance.

What's so special about it?	What does this mean for you?
Excellent solar protection	– Saves on cooling costs
Excellent solar protection properties	– Saves on air conditioning costs
Excellent light transmission	– Lets a comfortable level of light into the room
Low emissivity	– Reduces the likelihood of condensation forming on the glass
Neutral appearance combined with medium reflection	– Blends well with all types of PVC frames
