

ARTLITE DIGITAL DECORATIVE PATTERNS

Digitally printed
decorative glass

Developed exclusively for AGC by Belgian designer Martine Coelmont, the *Decorative Patterns* collection is part of the Artlite Digital range of digitally printed glass, which features one surface covered with permanent designs.

The eight *Decorative Patterns* were designed in ideal proportions, striking the right balance between opacity and transparency. Since they can be applied to all or part of the glass surface, vertically or horizontally, in large or small dimensions, they offer endless options for creating innovative and stylish interiors.

Depending on the pattern, its size and how it is used, you can adjust the level of privacy according to your needs. For specific projects, you can order the patterns in other colours, dimensions or opacity levels*.

Our *Decorative Patterns* will brighten up to your doors, shower screens, balustrades and partitions. They can be used as single glazing, in Thermobel insulating glazing or in combination with other AGC products, such as Colorbel and Lacobel T.

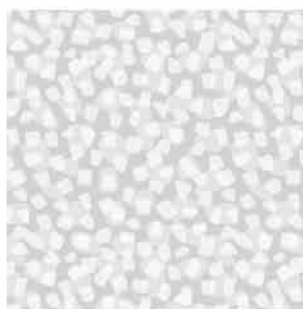

*For technical specifications, see the Artlite Digital factsheet.
